Clinical							
170.315(a)(1). Computerized provider order entry (CPOE) – medications	This functionality enables users of CEHRT to place Medication orders, Lab Orders and Imaging orders electronically.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires a separate ePrescribing annual or monthly fee. Controlled substances require additional services from Newcrop which may have additional registration and contract required.	No additional costs or fees		A contractual agreement is required. Newcrop may have additional registration and contract required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(2). Computerized Provider Order Entry (CPOE) – Laboratory	This functionality enables users to create and change laboratory orders for patients, as well as access information regarding the laboratory orders.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.		Interfaces to Labs is usually paid for by the Labs. However, if a lab does not pay for the interface, then the client needs to purchase the interface which includes a one time fees as well as annual or monthly fees based on number of providers	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(3). Computerized Provider Order Entry (CPOE) – Diagnostic Imaging	This functionality enables users to create and change Radiology/Imaging orders for patients, as well as access information regarding the Radiology/Imaging orders.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.		Interfaces to Radiology vendors is usually paid for by the vendors. However, if the radiology vendor does not pay for the interface, then the client needs to purchase the interface which includes one time fees as well as an annual or monthly fee based on number of providers	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(4). Drug-to-Drug, Drug-to-Allergy interaction checks	This functionality enables CEHRT users to be alerted for potential drug interaction alerts before they commit the orders to patient's chart. The Base subscription to the CEHRT provides access to Medi-Span Drug utilization review alerts during the process of ordering medications.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires a separate ePrescribing annual or monthly fee. Controlled substances require additional services from Newcrop which may have additional registration and contract required.	Additional costs includes annual subscription fees to Newcrop		A contractual agreement is required. Newcrop may have additional registration and contract required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(5). Demographics	This functionality enables CEHRT users to capture demographic information of the patient. This capability is part of Base EHR subscription. There is integration with PM system and PM system is the source for capturing demographic data as part of patient intake process.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	Integration with 3rd party Practice Management System will involve interface cost: one time service fees to setup the interface as well as additional monthly maintenance		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(6). Problem List	This functionality enables a user to electronically record, change, and access a patient's active problem list over multiple encounters, following ICD-9, ICD10, and SNOMED standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(7). Medication List	This functionality enables a user to electronically record, change, and access a patient's active medication list as well as medication history over multiple encounters, following RxNorm, CVX, and NDC standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(8). Medication Allergy List	This functionality enables a user to electronically record, change, and access a patient's active medication-allergy list as well as medication-allergy history over multiple encounters, following RxNorm standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(9). Clinical Decision Support	Through support of content programs, users can leverage real-time, patient-specific, actionable alerts and notifications. Instant access to critical data and prospective notifications based on real-time documentation facilitate positive behavior changes at the point-of-care, improving patient outcomes.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	Other third party sources of CDS resources may require an additional fee which may include an upfront development cost as well as additional one time license fees and annual or monthly fees.		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(10). Drug Formulary and Preferred Drug List Checks	This functionality enables a CEHRT user to perform Drug Formulary checks during medication prescriptions. This functionality is included in base CEHRT subscription and utilizes the Surescripts eligibility files to determine formulary coverage.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires a separate ePrescribing annual or monthly fee. Controlled substances require additional services from Newcrop which may have additional registration and contract required.	No additional costs or fees		A contractual agreement is required. Controlled substances require additional services from Newcrop which may have additional registration and contract required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(11). Smoking Status	This functionality enables a user to electronically record, change, and access the smoking status of a patient using ICD and SNOMED standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(12). Family Health History	This functionality enables the user to electronically record, change and access a patient's family health history.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(13). Patient-Specific Education Resources (InfoButton)	This functionality enables the user to electronically identify patient-specific education resources based on data included in the patient's problem list, medication list, and laboratory tests and values/results, according to InfoButton standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.

170.315(a)(14) Implantable Device List	This functionality enables capture of patient implantable device data as history in the chart. The certified EHR interacts with FDA Webaccess GUID to incorporate the device ID and Unique device identifiers for the implantable device.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(a)(15) Social, Psychological, and Behavioral Data	This functionality enables capture of social, psychological and behavioral data in a question and answer format in patient chart. This functionality enables a user to record, change, and access social, psychological and behavioral data.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
Care Coordination								
170.315(b)(1) Transitions of Care	This functionality enables a user to electronically create and transmit a transition of care/referral summary in C-CDA format, which includes encounter diagnoses, immunizations, cognitive status, functional status, the reason for referral, and referring or transitioning the provider's name and office contact information. The solution follows C-CDA and Direct standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.	The customer must pay EMRDirect for a Direct Messaging address to communicate with external entities in a secure fashion.		A contractual agreement is required. EMR Direct may have additional required contracts	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software. Users must be set up with Direct addresses to be able to receive C-CDA referrals from providers in other EHRs.	All providers must have an active license in order to use the software.
170.315(b)(2) Clinical Information Reconciliation and Incorporation	This functionality enables a user to electronically reconcile problems, medication allergies, medications, and immunizations listed in an incoming transition of care/referral summary C-CDA format to against the patient's medication list, problem list, medication-allergy list, and immunization list in the EHR.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.	The customer must pay EMRDirect for a Direct Messaging address to communicate with external entities in a secure fashion.		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software. Users must be set up with Direct addresses to be able to receive C-CDA referrals from providers in other EHRs.	All providers must have an active license in order to use the software.
170.315(b)(3) Electronic Prescribing	Complete with drug-drug interaction checks, allergy checking and plan-specific formularies, this functionality enables a user to prescribe and route prescriptions directly from the exam room to the patient's preferred pharmacy for faster fulfillment. The solution uses ReNorm and NCPD standards, and the SureScripts infrastructure for prescription transmission to the pharmacy.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires a separate ePrescribing annual or monthly fee. Controlled substances require additional services from Newcrop which may have additional registration and contract required.	Additional costs includes annual subscription fees to Newcrop		A contractual agreement is required. Newcrop may have additional registration and contract required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(b)(6) Data export	This functionality enables a user to electronically create a set of export summaries for all patients in C-CDA format that represents the most current clinical information about each patient. It includes clinical data defined in the Common Clinical Data Set, the reason for referral, and the referring or transitioning provider's name and office contact information.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	If an external interface for submission of CCDAs is required by a client, an additional fee which may include an upfront development cost as well as additional one time license fees and annual or monthly fees.		A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
Clinical Quality Measures								
170.315(c)(1) Clinical Quality Measures (COMs) – record and export	This functionality enables a user to electronically capture and export all the data necessary to calculate each of the Criterions-supported Clinical Quality Measures (COM), including the codification of COM exceptions and exclusion.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(c)(2) Clinical Quality Measures (COMs) – import and calculate	This functionality enables a user to electronically import all the captured data needed to calculate each of the Criterions-supported Clinical Quality Measures (COM), and to calculate each certified COM using the Quality Reporting Document Architecture standard.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(c)(3) Clinical Quality Measures (COMs) – report	This functionality enables a user to electronically create a data file for transmission of Clinical Quality Measures (COM) data according to the Quality Reporting Document Architecture standard.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
Privacy & Security								
170.315(d)(1) Authentication, Access Control, Authorization	This functionality verifies against a username that a user seeking access to electronic health information is the one claimed and establishes the type of access to electronic health information a user is permitted based upon security.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(2) Auditable Events and Tamper-Resistance	This functionality logs and audits user activity while accessing the system and provides a mechanism to assure the information audited is not tampered	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(3) Audit Report(s)	This functionality enables a user to create an audit report for a specific time period and to sort entries in the audit log	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(4) Amendments	Permits a patient to submit an amendment to their electronic health record	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(5) Automatic Access Time-Out	This functionality automatically stops user access to health information after a predetermined period of inactivity	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.

170.315(d)(6) Emergency Access	This functionality permit an identified set of users to access electronic health information during an emergency.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(7) End-User Device Encryption	EHR Technology is designed not to locally store electronic health information on end-user devices	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(8) Integrity	This functionality allows the system to create a message digest using a hashing algorithm with a security strength equal to or greater than SHA-2, to ensure that the content has not been altered.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(d)(9) Trusted Connection	Encrypt and integrity protect message contents in accordance with the standards. A hashing algorithm with a security strength equal to or greater than SHA-2 is used	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
Patient Engagement -								
170.315(e)(1) View, Download, and Transmit	This functionality enables patients to view, download or transmit their health information in the Criterions' patient portal that was sent from sent from the Criterions EHR. The data encompasses the common clinical data set and potentially may include other data, including notes and documents. Any time there are patient chart changes, the EHR automatically sends in update of the chart in CCDA format to the Criterions Patient portal for the patient to view.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This functionality requires a client's patients to use the client's patient portal, which allows for secured transmission of patient health information from the EHR so the patients can view their health information. The Patient Portal is included as a part of the client's EHR.	No additional costs or fees	A variety of additional services are available for customers who prefer to implement customized solutions for their portal and need assistance and development from Criterions. Custom services are charged on an hourly basis or as contracted. These custom services may include portal customization, client branding and client preferred color scheme.	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software. User must use most current browser products which support the highest level of encryption as dictated by best practices implemented by Criterions.
170.315(e)(2) Secure Messaging	This functionality enables users to send and receive secure messages to/from patients in the EHR using the Criterions patient portal. Secure messages may be initiated by the provider using the EHR or the patient using the patient portal, and may include clinical data, administrative data, and other information. This requires an integration interface with the EHR and allows for the secure message to be exchanged with the provider in their own EHR workflows.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This functionality requires a client's patients to use the client's patient portal, which allows for secured transmission of patient health information from the EHR so the patients can view their health information. The Patient Portal is included as a part of the client's EHR.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software. User must use most current browser products which support the highest level of encryption as dictated by best practices implemented by Criterions.
170.315(e)(3) Patient Health Information Capture	This functionality enables user to capture patient health information into chart to support better patient engagement in their care. Criterions Patient portal can be utilized to provide this data in addition to FHIR functions.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
Public Health								
170.315(f)(1) Transmission to Immunization Registries	This functionality electronically transmits the recorded or changed immunization information to a state registry using HL7 Immunization Messaging standard.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. An HL7 Immunization interface is required for transmission between Criterions and the external registry. Implementation fees are not included in the EHR maintenance. Each registry integration will have different costs, one-time fees as well as monthly maintenance. Criterions will only setup Immunization with registries that follow the standards for which Criterions was tested during the ONC 2015 certification. Any additional changes or customization required by the registries is billed to the client.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software. Criterions will only setup immunization with registries that follow the standards for which Criterions was tested during the ONC 2015 certification. Any additional changes or customization required by the registries is billed to the client.
Design & Performance								
170.315(g)(2) Automated Measure Calculation	This functionality enables certifying EHR to record and calculate objective measures.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(g)(3) Safety-Enhanced Design	This functionality enables certifying EHR to meet the summative usability guidelines for end users.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(g)(4) Quality Management System	This functionality enables use of certified EHR technology for users with disabilities. Professional EHR adhered to WCAG 2.0 standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(g)(6) Consolidated CDA Creation Performance	This functionality certifies the CDA performance for all CDA documents generated from certified EHR to ONC prescribed standards.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately.	No additional costs or fees	None	A contractual agreement is required.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.	All providers must have an active license in order to use the software.
170.315(g)(7) Application Access – Patient Selection	This functionality enables patient to connect with any 3rd party patient engagement App using FHIR APIs with their practice EHR.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.	Any Criterions engagement related to the integration of a third-party application with the EHR may involve an additional fee which may include an upfront development cost as well as additional one time license fees and annual or monthly fees.	If the use of any third-party application requires additional data capture or extended storage, additional hardware may be required to accommodate the additional storage and additional hosting fees may apply.	The client needs to contract with EMRDirect to get access to FHIR services. Security best practices are deployed for the FHIR API. Application Developers who would like to provide access to patient health information through the FHIR API need to agree to the Developer Portal Terms of Use and FHIR API License Agreement, associated with establishing a Developer Open Access Account. This agreement is provided after contacting support@criterions.com.	None	None	All providers must have an active license in order to use the software.
170.315(g)(8) Application Access – Data Category Request	This functionality enables patient to connect with any 3rd party patient engagement App using FHIR APIs with their practice EHR and request data from Common Clinical Data set categories	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.	Any Criterions engagement related to the integration of a third-party application with the EHR may involve an additional fee which may include an upfront development cost as well as additional one time license fees and annual or monthly fees.					Criterions provides clients the FHIR API as part of the Criterions EHR in conjunction with EMRDirect. However, it does not provide the applications that use the Criterions or EMRDirect FHIR API. Providers and/or patients are responsible to identify and/or purchase the applications that have been identified as Production Ready.

170.315(g)(9) Application Access – All Data Request	This functionality enables patient to connect with any 3rd party patient engagement App using FHIR APIs with their practice EHR and request their CDO data	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.	Any Criterions engagement related to the integration of a third-party application with the EHR may involve an additional fee which may include an upfront development cost as well as additional one time license fees and annual or monthly fees.					
Transport Methods and Other Protocols								
170.315(h)(1) Direct Project	This functionality allows certified EHR to connect with any HIE and demonstrate interoperability using DIRECT protocols.	This capability requires the Criterions EHR product which is sold to customers with a one time License fee plus an annual or monthly fee per provider or user. Training and implementation fees as well as travel expenses are billed separately. This capability also requires separate service from EMRDirect.
